

Corporate Video Filming & Production

Studio Innovations specialises in the production of high quality Product Promotion and Training videos for corporate clients.

Filming:

In-studio and on-location filming is provided via four Sony HD/SD video cameras, and a wide range of broadcast-quality microphones (shotgun and wireless).

Video Editing & Post:

Our video editing suite is entirely digital and supports all major SD and HD video formats with real-time hardware and off-line software-based format conversion if needed. Our air-conditioned control room is designed for video editing and accurate sound balancing.

Sound Recording and Editing:

Studio 1 is an acoustically controlled sound space available for filming interviews and tutorials. Studio 3 is a vocal booth ideal for voice recordings and overdubs. Digital recording, editing and mastering are all available in-house.

DVD Authoring:

Professional DVD production and rendering to web-compatible, DVD and other formats is provided.

Filming:

Four professional Sony HDV/DV cameras are on hand for in-studio and on-location shoots, providing multi-cam filming for training, promotional, safety and documentary style DVD's. Studio 1 is acoustically designed for interviews and product training, fitted with Videssence and PAR-can studio lighting and backdrop. On-location filming is available with full post facilities to provide a professional finished product on DVD and web-compatible formats.

Video Editing:

Formats supported include PAL, NTSC, 4x3 and 16x9, HD and SD, DV, HDV, DVCAM etc. Our editing suite is entirely digital.

Monitoring:

Audio monitoring is provided by Dynaudio AIR 20 reference monitors with an AIR-sub, and JBL 4328 near-field monitors. Vision is monitored on Sony broadcast reference monitors, SyncMaster widescreen monitors and a Sony 46" LCD screen.

Sound Recording:

Our studio is extremely well setup for sound recording, featuring a wide range of solid-state and valve preamplifiers, microphones and outboard processing. The primary recording system comprises 16-channels of Lynx Aurora mastering A-D's and 8-channels of Focusrite ISA-428 A-D's, plus an additional 8 channels of AES direct digital input. A current equipment list can be downloaded from our website www.studioinnovations.com.au or by contacting us via phone or email.

Delivery:

Final output can be delivered on DVD, DVD-ROM, VCD, CD-Extra, Flash and formats suitable for internet upload and playback on mobile devices.

Facilities:

Our studios are located in five acres of beautiful natural bush just 25 minutes south of Perth CBD. Facilities include a refreshments area with microwave, fridge and coffee machine; outside entertaining area with BBQ.

Prices:

Our standard commercial studio rates for recording, mixing, mastering and video post-production are published on our website. Please contact us for a quotation that addresses your specific requirements.

Questions:

Please contact us if you have any questions. Our office hours are 9am to 5pm, Mondays to Fridays, but our studio is frequently operational during evenings and on weekends, so feel free to call us at any time.
